Tip from VyStar: Using Your Account Numbers Electronically

Please verify your account numbers and routing numbers when you set up your bill payment and electronic account services.

For deposit accounts, use the account number listed on your checks, your monthly paper statement or e-Statement. For loan accounts, use the 12-digit account number found at the bottom of your payment coupon. For the routing number, always use 263079276.

Because a majority of our members have several accounts with us, we ask that you use specific account numbers for your electronic services instead of your member number. Using your member number will cause a delay to your transaction.

Thank you for paying special attention when setting up these services.
